From the workshop

01 Gemstone Drilling

Precision Laser and diamond drilling for all types of gemstones, from soft to extremely hard minerals.

We use state-of-the-art Laser drilling technology to create perfect holes without risking fractures. Suitable for beads, pendants, and industrial components in any gemstone variety.

02 Beads Making

Custom bead manufacturing in various shapes: rounds, faceted, rondelles, and unique free-form designs.

Our artisans specialize in transforming rough material into uniform or graduated bead strands. We offer various finishes from high-polish to matte, ensuring consistent size and quality.

03 Gemstone Polishing

Professional polishing services to restore the luster and brilliance of your gemstones and jewelry.

Using premium diamond abrasives and traditional techniques, we remove scratches and surface wear to bring back the original fire and brilliance of your gems.

04 Gemstone Faceting

Expert faceting to maximize light return and color purity following precise geometric patterns.

Our master faceters use precision machinery to cut gemstones into standard or custom designs, optimized for the specific refractive index of each mineral.
